SALE LIST NO. 4 CANADIAN TOKENS & MEDALS

McColl nos. refer to Sale Catalogue "Coins and Pattern Pieces...." (reprint available at \$10.00) Tokens were nominally struck in aluminum. Off-metal pieces such as german silver, copper, & brass are, in many cases patterns, having been struck as samples for the merchants. In many instances, orders were not submitted for the metal varieties, and, only the limited amounts first issued as samples were struck. It has been found however, that the supposed mintages do not always coincide with the amount of known specimens. This is because orders were secured for these so-called pattern coins; or, as seems the most likely explanation; the dies remained extant and were acquired by collectors. Most of these tokens were struck by the Cranston Novelty Co., Galt, Ont., and Pritchard & Andrews, Ottawa. The second reference work that I draw attention to is written by Mr. Fred Bowman, and published by the Numismatic Research Society, 1966. This is an excellent book entitled TRADE TOKENS OF ONTARIO. Containing 108 pages, it describes upwards of 2500 trade tokens, the majority of which have never previously been catalogued. Copies are available at \$3.00 each. A very limited amount were published.

- 103 Ontario. Port Hope. "McNish" token. This is a blank
planchett 27mm with rolled edges. This is
truly numismatic folklore. I quote from an
article published in Mehl's Numismatic Jour-
nal, Jan. 1917. "McNish was an old Blacksmith
who lived at Port Hope, and at a time (or be-
fore) coins struck from dies were in general
use there. I had it from Mr. George Healey,
an old teller at the Bank in Port Hope, that
they-the bank officials-were glad to get them
for use, and when a batch of fifty came in
they would say 'McNish is coining again.' I
knew McNish in 1854; he used to cut them out
of old brass and copper boilers and kettles."
This article was written by Thos. A. Wood.
McNish tokens are rather scarce now. 20.00
