Canadian Pocket Mirror Cards

The intent of this comprehensive listing of Canadian Pocket Mirror Cards, with images where available, is to serve as a reference of the collectable Canadian pocket mirror cards that I am aware of. It is also being distributed to solicit feedback as to any errors, new entries and to obtain missing images I was not able to obtain. Collectors of exonomia items such as encased and spinners usually seem attracted to these interesting advertising mirrors that are generally not related to numismatics but are still interesting and fun to acquire, research and catalogue. There are however, a small number of pocket mirror that are tokens in that they are “Good For”. Given the limited research in this area of these Canadian collectable items it has been fun to catalogue and research and add in what continues to show up from time to time. As an added bonus of sorts, I have also included, in a separate listing, a few similar advertising items such as whetstones, record cleaners, tape measures, games and match safes, etc..

Since the reverse of these mirrors are glass I did not bother to specify or show the reverse in each entry unless there is visible lettering or something unusual about the glass or reverse edges.

When stating dimensions I have rounded to the nearest half millimetre for those I was able to take dimensions of. I have used the notation $\frac{1}{2}$ rather than the proper SI Standard of .5 as it is easier to pick out and follows on from the many documents that I was able to obtain information from. For my own record keeping I round the number to one decimal place. Dimensions should be taken as “order of magnitude” only and not to museum or archive standards. As I received information and images from many different sources the accuracy does vary.

To ensure only one entry for each piece that has multiple locations on it (i.e. Pat Burns & Co. Calgary and Vancouver; and Stevenson’s Ltd., London and Windsor) I generally try to put the image under the first name appearing on the piece with references to it in the other locations.

A listing of interesting items of this nature would not have happened without the input from the collectors of these pocket mirror cards and similar advertising pieces. Acknowledgment for contributions to this listing include the pages, and the many collectors who made contributions to: *The Canadian Token*, *Numismatica Canada*, *Transactions of The Canadian Numismatic Society*, and to exonomia collectors James Astwood*, Len Buth, David Byard, Glenda* & John* Cheramy, Kevin Day-Thorburn, Jim Dixon, Scott Douglas, Chris Faulkner, Ron Greene, Grant Harper, Edward Heilman, Elmer Lupul, Al Munro, Ron Rogal, Tim Saunders, Stan Sherstobitoff, as well as the *Canadian Museum of History*, *The Token Catalog* websites, *eBay*, etc.. I have only included those images that I was able to obtain permission to use.

If you come across any errors or have unlisted pieces or additional images I would appreciate hearing from you. I can be contacted by email at egjensen@telus.net.

PPaM R 87½ [19]

Squires For Premier

THE LADY ON THE OTHER SIDE / IS REQUESTED TO / VOTE FOR / SQUIRES / FOR PREMIER

[Sir Richard Anderson Squires was Prime Minister of Newfoundland from 1919 to 1923 and from 1928 to 1932. He was born on 18 January 1880 in Harbour Grace and died on 26 March 1940 in St. John's.]

[Is this attribution correct? Squires was the Prime Minister not Premier as indicated on mirror. Being made in the US is it just an oversight? It has been said that Joey Smallwood was Squires campaign manager? Times magazine and newspaper articles list Squires as a Premier.]

Ottawa Canada

(Indian Chief) / OTTAWA / -CANADA- / FRENCH / IVORY

French Ivory

french ivo·ry | 'french ïv-rē *noun*

A plastic produced to simulate ivory

In the late 19th century, a type of synthetic material was created to imitate natural ivory which was expensive and difficult to obtain. The result was French Ivory, first produced by the Xylonite Company in 1866. The material, often also known as ivoride, ivorine, and pyralin, is made from celluloid, a type of thermoplastic that was very popular until the middle of the 20th century. It has a series of parallel lines on the surface that help differentiate it from natural ivory, and it weighs less than ivory, but it was popular in use for things like flatware handles, gaming pieces, furniture decorations, and many other items that are now popularized in antiques. The earliest attempts to make an artificial substitute for ivory were ineffective, but by adding camphor to the mixture, French Ivory was created at a relatively low cost compared to the natural alternative.

The Good Looking Person / On The Other Side / Is Going To VOTE For / A. ROSS WEBSTER / Progressive Conservative Candidate / St. Antoine -Westmount / Progressive Conservative Committee // (edge) Ad-Specialty Co Mfg 1206 Fort Street Montreal

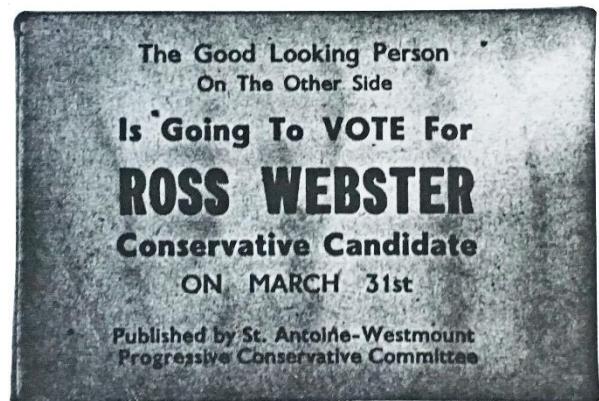

PPaM Re 78½ x 53

The above mirror is from the 1957 federal election. It is made by and marked on the rim "Ad-Specialty Co Mfg 1206 Fort Street Montreal". The following two mirrors, one English and one French for Ross Webster were for the March 31st election which was in 1958. Webster only ran twice in 1957 and 1958. When he ran in 1957 he ran as "A. Ross Webster" like the mirror, while in 1958 he ran as simply "Ross Webster", as the two March 31 mirrors highlight. It is likely there is a French version or mate for/to the 1957 mirror, but we do not know for sure, yet.

- Canadian Match Safes / Match Holders
- Other Similar Advertising Items

Whetstones, Match Safes And Other Similar Advertising Items

The intent of this listing of Whetstones, Match Safes, Etc. with images where available, is to serve as a reference of the collectables that are often associated with and collected by Canadian Pocket Mirror Card collectors. The items appearing here are included at the end of the pocket mirror cards as they are similar in many ways and need to be documented when the opportunity to do so presented itself. It is also being distributed to solicit feedback as to any errors, new entries and to obtain images I was not able to obtain. It is intended to be a good starting point only. Collectors of exnumia items such as encased and spinners usually seem attracted to these interesting advertising items that are not related to numismatics but are still interesting and fun to acquire, research and catalogue. Given the limited research in this area of these Canadian collectable items it has been fun to catalogue, research and add what continues to show up from time to time.

When stating dimensions I have rounded to the nearest half millimetre for those I was able to take dimensions of. I have used the notation ½ rather than the proper SI Standard of .5 as it is easier to pick out and follows on from the many documents that I was able to obtain information from. For my own record keeping I round the number to one decimal place. Dimensions should be taken as “order of magnitude” only and not to museum archives standards. As I received information and images from many different sources the accuracy varies.

To ensure only one entry for each piece that has multiple locations on it (i.e. *The Breadmore Belting Co. Limited* Toronto and Winnipeg) I generally try to put the image under the first name appearing on the piece with references to it in the other locations.

A listing of interesting items of this nature would not have happened without the input from the collectors of these advertising pieces. Acknowledgment for contributions to this listing include the pages, and the many collectors who made contributions to: *The Canadian Token*, *Numismatica Canada*, *Transactions of The Canadian Numismatic Society*, and to exnumia collectors James Astwood*, Len Buth, Glenda* & John* Cheramy, Jim Dixon, Ron Greene, Grant Harper, Al Munro, Ron Rogal, Tim Saunders, as well as *The Token Catalog* website, *eBay*, etc.. I have only included those images that I was able to obtain from the above collectors.

If you come across any errors or have unlisted pieces or additional images I would appreciate hearing from you. I can be contacted by email at egjensen@telus.net.

Maple Leaf

(crown, maple leaf) // (blank)
 [The metal used for these match safes are often labelled as 'gunmetal'. Gunmetal is non-magnetic and many of these match safes are magnetic. The ones that appear to be gunmetal are generally treated steel made to simulate gunmetal. The standard designation for iron based metals, such as steel, is 'I' which I have used for these match safes.]
