Canadian Exonumia - Encased

The intent of this continuing listing of Canadian Encased, with images where available, is to serve as a reference of Canadian encased items that have been found in various Canadian numismatic publications as well as those made available from various collectors. It is also being distributed to **solicit feedback** as to any errors, new entries and to obtain images I was not able to obtain. As it is highly unlikely that this is anywhere near a complete listing of Canadian encased exonumia it should be considered as a good starting point for collectors to review and provide feedback as to any errors and omissions. Collecting encased items can be an interesting and rewarding part of our numismatic pastime. Given the limited research this area of Canadian numismatics has received over time it is evident much more can be done to further research, record and publish on this topic.

What is not included in this reference are: cardboard or paper items except for a few of the Canadian 'Put-A-Penny' cents (included near the end of the listings); encased casino chips/tokens; plastic encased exonumia (with a few exceptions); nor those items encased in what is generally referred to as Lucite (includes plastic / resin / etc.). These collectibles should, if not already done, be considered for future research and published articles. I also have not included any references to auction results, which again could be undertaken in a future catalogue.

It seems that many of the encased collectors like to include the various varieties in their collections of encased that they come across. I have chosen to leave the cataloguing of these variations and varieties for others to tackle. This would include the up-up and up-down and rotated coin variations as well as coins in opposite obverse and reverse configurations. I also have not included any weights.

When stating dimensions I have rounded to the nearest half millimetre for those I was able to take dimensions of. I have used the notation ½ rather than the proper SI Standard of .5 as it is easier to pick out and follows on from the many documents that I was able to obtain information from. Dimensions are not to museum accuracy measurements usually to two decimal places and should be taken as "order of magnitude" only. As I received information and images from many different sources the accuracy varies. As well, identical encased pieces will have slightly different dimensions due to the striking and the amount of wear.

Encased exonumia made for advertising purposes, as well as those expressing a "good for" value, have been used in Canada from approximately the beginning of the 20th century. The majority of encased items especially the earlier ones, are advertising related and carry slogans such as "Good Luck", "Keep Me and Never Go Broke" and "Keep Me And Prosper". The obverse generally provides the merchant's or organization's name with the reverse showing the above slogan and one or more of the following images: a horseshoe, a four leaf clover, rabbit's foot, a wish bone, etc. The early encasements consisted of either an American or Canadian cent.

Articles on these interesting pieces have appeared in the pages of *The Canadian Token (Cee Tee)*, *Numismatica Canada (NC)*, *Canadian Numismatic Research Society (CNRS) Transactions* and many other provincial specific publications. Most of these reference documents are available from the Royal Canadian Numismatic Association (RCNA) Library. This article is not intended or suggested to provide a complete listing of all known Canadian encased pieces. However, for the readers wishing to peruse some of the known issues they are shown below.

The fact that many of the early Canadian encasements consisted of U.S. coinage is no doubt the result of the manufacturers being situated there. Not all the listed encased pieces include a coin. These other pieces, as well as most encased, could be considered bimetal exonumia instead however they have been included here because of the close relationship with encased Canadian exonumia.

To ensure only one entry for each encased piece that has multiple locations on it (i.e. Weston Credit Jewelers and Jack Snow Credit Jeweller) I generally try to put the image under the first name appearing on the piece with references in the other locations.

A listing of numismatic items of this nature would never be possible without the input from the many collectors of encased exonomia as well as the information obtained from the other sources mentioned. Acknowledgment for contributions to this listing include: all of the authors who contributed to the publications listed above (the starting point) as well as Al Munro, Alan Roy, Barry Uman, Brian Thomson, Dave Byard, Elmer Lupul, Eugene Simms, James Astwood*, James Williston, John Humphrey, Len Buth, Marcus Molenda, Rick Craig, Roger Dent, Ronald Greene, Ron Rogal, Ryan Lawson, Scott Douglas, Tim Henderson, Tim Saunders, The Token Catalog, etc.. I have only included those images that I was able to obtain from the above collectors. Ones without images were obtained from other sources.

I have formatted the document for printing however I would suggest that you print it out in smaller batches to ensure that my formatting is correct.

If you come across any errors or have unlisted pieces I would appreciate hearing from you. I can be contacted by email at egjensen@telus.net.

There are varieties in the Winsor Canadian encased pieces. The most notable difference is in the spacing of the lettering between the 'R' in 'Windsor' and the 'C' in 'Canada'. The most common variety is where the lettering is closer together. So far we have found the lettering is farther apart on the 1965, 1972, 1974 and the U.S. Oregon (1974) and Bicentennial (1976) pieces. The original order above from The Osborne Coin Co. requested 10,000 encased with the hole pre-drilled. So far we have only been made aware of a small number of encased from 1965 that have the requested hole. Makes one wonder where the other 9,980+ are hiding out.

The Lusk Hat & Scarf Inc.

[On 5 November, 1955 The Lusk Hat & Scarf Inc., located at 417 Peter Street, ordered 12,000 aluminum horseshoe shaped encased from The Osborne Coinage Co. of Cincinnati, Ohio. The obverse was to read "Keep Me And / Never Go Broke with a plain reverse with chain hole but no chain (Order No. 4691). This was followed up with another similar order for an additional 12,000 on 25 November 1955 (Order No. 4733. A third order was placed on 25 August 1956 for another 12,000 (Order No. 5493). One has to wonder what the 36,000 encased would have been used for.]

<p>“The first Canadian penny made in Canada - In January of 1908, Countess Grey, wife of the Governor General, inaugurated the new Canadian branch plant of the Royal Mint by ceremonially striking a one-cent piece- the first produced in Canada. Prior to that, all Dominion of Canada coinage had been minted in the U.K. This coin was gold plated as a souvenir.” <i>National Currency Collection</i></p> <p><i>One of the first coins (one cent) struck in Canada</i></p> <p>Many varieties and variations exist in this series with different mountings such as hangers, loops, brooch backs and studs with some being silver plated. The reverse can either have a patterned or plain frame.</p>

Canadian Voyager Dollar - Over Struck Cent

(Canadian silver dollar) / (over struck Canadian cent)
 EMANUEL HAHN'S / No. / xx / of / 52 / VOYAGEUR
 DOLLAR // (Canadian silver dollar) / (over struck
 Canadian cent) CANADA / 1935 - 1987

Kelly Finnegan – Encased Canadian Silver Dollars.

In or about 1998 Kelly Finnegan, at that time residing in Salt Lake City, Utah, made 52 encased Canadian silver (voyageur reverse) dollars which were designed by Emanuel Hahn. Only “young head”/ laureate (1953-1957 & 1959-1963) and tiara (1965-66) silver dollars were used. The holes in the dollars were drilled. The encasements were struck on Canadian copper cents, and appeared in the centre of the dollar. All coins used were uncirculated. The obverse side of the cents (in the obverse side of the dollar) had a cent over struck with “Emanuel Hahn’s Voyager Dollar” along the sides, and in the centre had “No.,” below had the specific number struck (between 1-52) and below, “of / 52”. The reverse of the cent had “Canada” at top, an image of the voyageur canoe in the centre, and “1935-1987” at the bottom. Each encased silver dollar purchased also came with another copper cent (as used as the encasement) which had the specific number used cancelled with a large X. Additionally Finnegan included another additional Canadian copper cent, with one side having “K.P Finnegan. Numismatist etc.” and the others side over struck as above with the voyageur canoe. Finnegan remains a numismatist and owns Penny Press Mint. He is Past President of the Utah Numismatic Society.

<p style="text-align: center;"><i>Oak Ridge National Laboratory</i></p> <div style="border: 1px solid black; padding: 10px;"> <p style="text-align: center;">OAK RIDGE NATIONAL LABORATORY operated by CARBIDE AND CARBON CHEMICALS COMPANY A Division of Union Carbide and Carbon Corporation Oak Ridge, Tennessee</p> <p style="text-align: center;">NEUTRON BOMBARDMENT OF A SILVER COIN</p> <p>This coin was exposed in the Oak Ridge National Laboratory chain reacting pile for one minute. The neutrons in the pile struck some of the silver atoms in the coin making them radioactive. The three silver radioisotopes formed were (Silver) Ag¹⁰⁸ with a half-life of 2.3 minutes, (Silver) Ag¹¹⁰ with a half-life of 225 days and (Silver) Ag¹¹² with a half-life of 22 seconds. Two radioactive copper isotopes, Cu⁶⁴ having a half-life of 12.5 hours and Cu⁶⁶ having a half-life of 5 minutes, were also present due to the copper in the coin (about 10%).</p> <p>When the coin was removed from the pile, it was highly radioactive and, therefore, special precautions had to be used in handling it. If it had come in contact with or even close to the body for any appreciable time, injury might have resulted. Within a short time, however, most of the activity had decayed so that it no longer created a hazard. However, a small amount of Ag¹¹⁰ having a 225 days half-life remains. The amount of this radioisotope present was equivalent to 0.0000013 grams of radium at the time the coin was removed from the pile. After 225 days from that date, one-half of this amount will remain. The radioactive atoms formed in the coin decay by emitting beta particles from their nuclei. When a beta particle escapes, the nucleus loses one unit of its negative electrical charge and is thus changed to another element (transmutation): in this case, cadmium from the silver and zinc from the copper. These reactions can be written as follows:</p> <div style="display: flex; align-items: center;">  <table style="font-family: monospace; font-size: small;"> <tr><td>47Ag¹⁰⁸</td><td>- Beta Particle =</td><td>48Cd¹⁰⁸</td><td>(A stable isotope)</td></tr> <tr><td>47Ag¹¹⁰</td><td>- Beta Particle =</td><td>48Cd¹¹⁰</td><td>(A stable isotope)</td></tr> <tr><td>29Cu⁶⁴</td><td>- Beta Particle =</td><td>30Zn⁶⁴</td><td>(A stable isotope)</td></tr> <tr><td>29Cu⁶⁶</td><td>- Beta Particle =</td><td>30Zn⁶⁶</td><td>(A stable isotope)</td></tr> </table> </div> <p>Since the coin was in the pile for only one minute the quantities of radioactive silver and copper were very small. Therefore, the amounts of stable cadmium and zinc resulting from their decay are also small. In fact, the tiny amounts of cadmium and zinc originally in the coin as impurities greatly exceed the amounts produced by the neutron bombardment.</p> <p>The present activity of the coin is far below the biological danger level; therefore, it is safe to be handled.</p> </div>		47Ag ¹⁰⁸	- Beta Particle =	48Cd ¹⁰⁸	(A stable isotope)	47Ag ¹¹⁰	- Beta Particle =	48Cd ¹¹⁰	(A stable isotope)	29Cu ⁶⁴	- Beta Particle =	30Zn ⁶⁴	(A stable isotope)	29Cu ⁶⁶	- Beta Particle =	30Zn ⁶⁶	(A stable isotope)
47Ag ¹⁰⁸	- Beta Particle =	48Cd ¹⁰⁸	(A stable isotope)														
47Ag ¹¹⁰	- Beta Particle =	48Cd ¹¹⁰	(A stable isotope)														
29Cu ⁶⁴	- Beta Particle =	30Zn ⁶⁴	(A stable isotope)														
29Cu ⁶⁶	- Beta Particle =	30Zn ⁶⁶	(A stable isotope)

Put-A-Penny Coin

This is a sample of some Canadian 'Put-A-Penny' store tokens. **There are likely many different dates available for each piece as it was up to each individual to put a penny in the cardboard holder before returning to the store to redeem.** This would have led to many different dates for each issuer.

Leyse Aluminum Company Ad 1930

LUCKY MONEY
Always talks

They're Never Thrown Away *They're Always Kept for Years*

Lucky Coin Pocket Pieces—with new bright shining pennies in the center—and your ad stamped in raised letters on the silvery aluminum coin.

No one ever throws away money. That's why these Lucky Coins are such a valuable advertising medium.

Talk about an ad with a "long life". There isn't one person in a hundred who, after carrying one of these Lucky Pocket Pieces for awhile, does not become more or less superstitious over it. The result is that these Lucky Coins are kept for years.

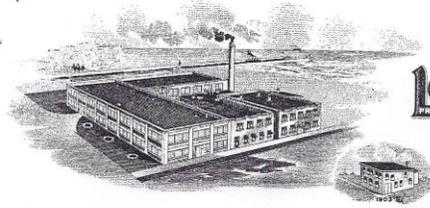

And they *always* carry the advertising copy of the firm that puts them out. The ad is stamped in raised letters so that it will always be there—it cannot wear off.

There's a *reason* why so many Advertisers continue using these Lucky Coins year after year. They have found them valuable builders of Good-Will at a surprisingly low cost.

Here's an ad that pays 100% because there is absolutely *no waste*. Lucky money *always* talks.

Leyse Aluminum Co.
PROHOUNCED BY THE

ESTABLISHED 1903

Kewaunee, Wis.

Dec. 18, 1930

Mutual Publicity Service,
 Troy, N. Y.

Attention: Mr. P. W. Gilman

Dear Mr. Gilman:

I hope you have had an opportunity to go over the catalog which we recently sent you, and I'm sure you have found it very interesting.

Of course we realize that advertising specialties must be "sold", but one thing in particular that I want to point out is that with our line you don't have to compete with prices quoted by some other manufacturer on a similar line -- because there isn't any other line like ours on the market.

Have you noticed what a big field our line covers? Just see what a large variety of different specialties we manufacture. One advertiser wants something for use in the home, another wants something for use in the office, another might want something for distribution at fairs or conventions. From our line you can make selections that will appeal to all of them.

To give you some idea of what our men are doing, I might say that one of them has one account that has bought over 250,000 Lucky Coins No. 4 within the last two years.

Another salesman, who has always been very enthusiastic over our aluminum Booster Plates, has averaged almost \$200.00 a month commission on the Booster Plates alone.

Another man has been pushing the Tol-Timer and has earned over \$450.00 in commissions in seven weeks on just Tol-Timer orders.

During the past month one of our other men sold 125,000 Snapper Jacks to one account, and 75,000 to another. Yesterday we had an order for 30,000 Key Tags No. 139 from one of our men and his commission on this one order was over \$260.00.

I could go on to enumerate many more cases, but these will show you what other men are doing with our line -- and the possibilities in it for you. And don't overlook the fact that we pay the full commission on receipt of order. This

LEYSE ALUMINUM COMPANY

SHEET NO. 2

is only one phase of our proposition that appeals to salesmen.

I believe, too, that you are interested in connecting with highly reputable manufacturers, and in connection with this I would refer you to our credit rating of \$500,000.00 with both Dun and Bradstreet. This business has been built up largely because of the unusual service and co-operation we give our men.

I look forward to hearing from you soon, and if there is any other information you want, I'll be glad to go further into detail.

Very truly yours,

LEYSE ALUMINUM COMPANY

L. Albert Karel
 Sales Manager

		2,500 to 4,999	67.00 M	98.00 M
		5,000 to 9,999	56.00 M	84.00 M
	10,000 to 24,999	46.00 M	72.00 M	

(3A, 1B, 1C)

STYLE C4			WITHOUT CHAINS	CHAINS ATTACHED
		1,000 to 2,499	\$55.00 M	\$95.00 M
		2,500 to 4,999	53.00 M	93.00 M
		5,000 to 9,999	46.00 M	82.00 M
		10,000 to 24,999	39.00 M	68.00 M

(2A, 1B, 2C)

STYLE C8			WITHOUT CHAINS	CHAINS ATTACHED
		500 only	\$50.00 Lot	\$ 68.00 Lot
		1,000 to 2,499	66.00 M	100.00 M
		2,500 to 4,999	62.00 M	96.00 M
		5,000 to 9,999	52.00 M	86.00 M
	10,000 to 24,999	44.00 M	72.00 M	

(3A, 1B, 1C)

NOTE: Optional Slogan "Keep Me and You Will Have Good Luck" can be furnished if specified on your order. The above prices include the cost of a die for embossing a plain lettering advertisement on the reverse side and are based on manufacturing and shipping the entire quantity at one time. — All illustrations are actual size. Hole punching only — without chain — \$6.00 per M extra (A). Coins must be shipped via Insured Parcel Post or Rail Express.

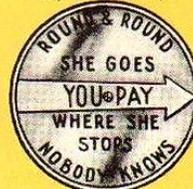

Special Quotations will be made on larger Quantities.

NOW IS THE TIME TO START USING THIS PERPETUAL CIRCULATOR OF YOUR AD! These 1 1/4" diameter coins made of bright polished Aluminum are now being offered at new low prices. Prices quoted include ad copy on reverse side in type form (APPROXIMATELY 60 LETTERS).

1,000 to 2,499	\$44.00 per M
2,500 to 4,999	34.00 per M
5,000 to 9,999	28.00 per M
10,000 to 24,999	23.00 per M
25,000 to 49,999	21.00 per M

SHIPPING WEIGHT APPROX. 8# PER M

(2A, 1B, 2C)

STYLE S-4

Lucky Spinner Coins

All quantity prices are based on making and shipping the entire quantity at one time. When ordering Spinner Coins specify Style S-4 and print copy on separate paper. There is no die charge when copy is confined to plain wording. Special quotations will be given where elaborate copy and designs are desired.

No order accepted for less than 1,000 Spinners. Special quotations will be made on larger quantities.

Shipments are F. O. B. Cincinnati 25, Ohio.
