

Alberta Cart Tokens

A Comprehensive Listing With Images

Revision

July 2024

JETAE

Alberta Cart Tokens:

As of July 2024

- o Most of the shopping cart tokens (quasi tokens) discovered so far are really advertising or charity fund raiser pieces (still “Good For’s”) and are not a redeemable token as such. Because of this it was decided to move all shopping cart tokens to a separate file from the Alberta Trade Token listing and assign them numbers different than those used in the main listing (now beginning with the letters ‘CT-’).
- o These particular tokens have many different names assigned to them including “Cart Token”, “Cart Coin”, “Kart Koin”, “Shopping Cart Coin”, “Pushcart Token”, etc..
- o Although many of the cart tokens are generic in nature and not specifically from Alberta they were all being distributed for use in Alberta.
- o “White Metal” is a term used (incorrectly) to basically describe any silvery coloured token (not aluminum) of either magnetic or non-magnetic material. White metal is generally defined as “Pewter and other Tin based alloy”, “A name given to a range of alloys usually containing antimony alloyed with tin, copper or lead to produce a white silvery metal used in the manufacture of medallions.” and is not used to make cart tokens. Not knowing the difference between similar appearing metals I use ‘**nmM**’ for non-magnetic metals I cannot identify and ‘**I**’ for all magnetic metals. Since most of the cart tokens are made overseas they could be a mixture of just about any number of different metals with many of them plated with various materials.
- o Many cart tokens (such as CMP Automotive - Calgary) appear to be a standard metal but when quite worn they appear to be plated copper. However, some when seeming to be of a copper base metal are magnetic which copper is not. We believe a magnetic base metal is copper plated to allow the chrome plating and enamel to adhere to the token. This would apply to many of the listed cart tokens.
- o As of July 2024 this listing consists of 443 cart tokens.
- o Indicated colours are best guess as the colour variations and reflections from the lettering make it difficult to determine the exact colour in many cases. Where there is no colouring, other than the colour of the metal, I have used the designation of ‘-’.

Note 1: Cart tokens without holes (pierced) for attaching to key chains have a key chain holder that the tokens slip into. Below are a sampling of the holders used for these tokens.

If this is the future of cart tokens we are going to have a tough time fitting them in '2x2's.

Unlocks shopping carts that require quarters.

Déverrouille le panier qui requiert des pièces de vingt-cinq sous

End Of Alberta Cart Tokens Listing

APPENDICES

The following information includes excerpts from *Donald M. Stewart's "Alberta Trade Tokens" (1987)* and has been altered, added to and expanded where necessary, based on the *Canadian Numismatic Research Society (CNRS) Standards*, Ronald Greene's *BCDatabase* and my preferences in documenting items of this nature.

SYMBOLS AND ABBREVIATIONS

MATERIALS:

Aluminum	A
Aluminum anodized red (or other)	Ar
Brass	B
Brass plated magnetic (or other plating / material)	BpI
Bronze	BZ
Copper	C
Cupro-Nickel	CN
Iron or steel (magnetic)	I
Nickel (magnetic)	N
Metal (nm non-magnetic)	M
Silver plated bronze (or other plating / material)	SpBZ
White Metal - Zinc, Pewter, Tin	WM

The silver or brass plating refers to the colour of the plating not the actual material used.

COLOURS:

Black	k
Blue	b
Brown	bn
Cream	cr
Gold	go
Green	g

Grey	gy
Maroon	mn
Multiple (3+)	multi
Orange	o
Pink	pi
Purple	pu

Red	r
Silver	s
White	w
Yellow	y
(no colour)	-

MISCELLANEOUS:

CT	Cart Token		incuse	letters cut into the token	
obv.	Obverse		(uniface)	one side is blank	
rev.	Reverse		(bifacial)	both sides are identical	
/	a single / indicates a line break		()	generally () are used to indicate a feature or a use for a token	
//	a double // indicates a change from the Obv. to the Rev. of a token		[]	generally [] are used to indicate additional information about a token	

SHAPES:

Db	Dogbone
He	Hendecagon (11 sided)
O	Octagonal (8 sided)
R	Round
R(p)	Round (hole other than centre)
R(pv)	Round (hole other than centre – oval shaped)

<p>R - Round</p>  <p>← →</p>	<p>R(p) - Round Pierced</p>  <p>← →</p>	<p>R(pv) - Round Pierced Oval</p>  <p>← →</p>	<p>He - Hedecagon 11 Sided</p>  <p>← →</p>	<p>↑ ↓</p>
<p>Double ended shopping cart token.</p>	<p>DB - Dogbone</p>  <p>← →</p>	<p>↑ ↓</p>		

- Note: 1 – Piercing (p) applies to any shape where present.
 2 – Measurement determined by the normal reading position.
 3 – Dimensions are generally to the nearest half millimetre (25.4 mm = 1.0 inch).

Cart Tokens - Maverick Locator

Generally the maverick cart tokens listed below are tokens that do not have the city or town named on them, and in many cases do not indicate that they are from Alberta.
