Fred Bowman has unquestionably carried out through the years the most thorough research into Canadian numismatics of anyone who has been associated with our exciting science.

He has devoted the spare time of his life to keeping the most accurate records of the research and writings of others. His painstaking record of the tokens, patterns and other numismatic material is beyond comparison. His own research and writing has been most impressive and extensive.

In providing serious Canadian numismatists with this Researcher's Index he has given to Canadian numismatists the results of his lifetime of work on our behalf.

We and succeeding numismatists will be forever grateful.

J. Douglas Ferguson
Honorary President,
Canadian Numismatic Association

The purpose of this index is to assist researchers in Canadian numismatics to locate articles or other data on the subject with the least possible delay.

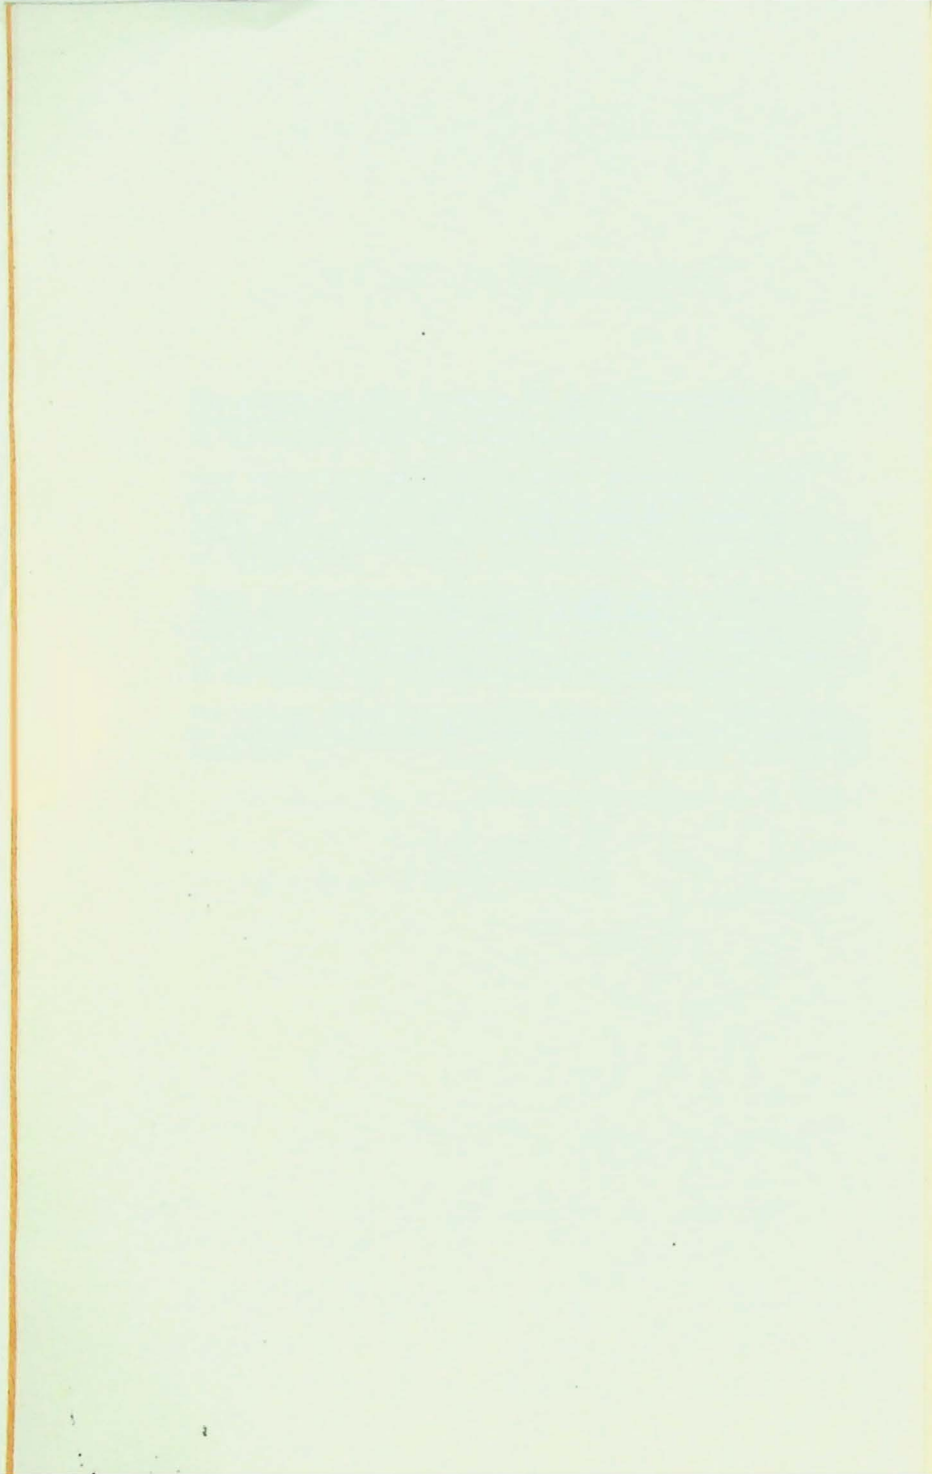

Only those writings which include historical or other pertinent information are included. Listings such as Leroux 1888, Breton 1912 or McColl are not shown as these give no useful data beyond the mere recording of the piece.

There are, of course, many writings and short articles which have appeared from time to time in local newspapers or foreign numismatic publications which have to do with Canadian numismatics but have not come to our notice and so could not be included here.

The numbers referred to in the index, part 1, correspond to the numbers of the writings shown in the bibliography, part 11.
