to be copied without written permission.

This work is dedicated to the man I consider my mentor, the late Leslie C. Hill (1916-2017) who had encouraged me over many years and set a fine example with his catalogues of Yukon and British Columbia tokens. He has also shared his information without reservation. RAG

Major contributors were/are, the late Tony Thomson, David Bergeron (of the National Currency Collection), the Royal BC Museum & Archives, Dick Hanscom (of Alaska Rare Coins) and Ed Mannings. Other contributors were/are the late Donald M. Stewart, the late Ralph Burry, Warren Baker, Norm Robidoux, Stan Sherstobitoff, Al Munro, Tim Saunders, Elmer Lupul, Duff Malkin, Todd Pugh, Rossland Museum & Discovery Centre, Kelowna Museums Society and The Museum of Gaming History Chipguide.

# The British Columbia Database

Introduction by Ronald Greene

Perusing the following pages will help you understand the premises upon which the original database and this current edition with images were formulated.

## Historical Background

Breton was the first cataloguer to list any British Columbia tokens. His 1894 work listed four such pieces. The first Canadian catalogues of the modern era (1950's) did no better. A few sales such as the McColl sale of 1903 and the Robie Reid sales of 1940-1941 added to the number of tokens known, but these were not included by the cataloguers. In 1962 the Vancouver Numismatic Society formed a Research Committee, composed of Leslie C. Hill, Scott Simpson and Larry Gingras, to study the numismatics of British Columbia. By 1963 Ronald Greene and Norman Williams had joined the committee and others were involved by 1966. When Fred Bowman went on an around the world trip in the mid 1950's he loaned his immense listing of Canadian tokens to Les Hill for the duration of the trip and these were incorporated in the early listings printed by the committee. These early listings were compiled by category, a way many of the early collectors collected, which made the initial work somewhat easier. By 1969 a combined catalogue was produced, mainly by Les Hill with Ron Greene adding the numbers and typing the manuscript. Some 1200 tokens were listed, a far cry from Breton's first attempt. Following the successful publication of that first catalogue the committee focused on the medals of British Columbia, but after a few preliminary lists of medals and a 1973 token catalogue supplement were produced, became dormant.

Since the committee was not functioning, Les Hill decided to continue alone. He revised the numbering system, added illustrations and published a catalogue in 1980. A supplement was necessary by 1984. It took many years to sell the catalogues and adding a second supplement did not appeal to Les. In 1994 he produced a check list, without line descriptions but with estimated values. This list was distributed to the main B.C. collectors in contact with Les. Meanwhile some of the older province-wide collections had been broken up and many of the collectors began focusing on one area or another due to the large number of tokens which had been used throughout the province. More than half the current collectors have restricted themselves to the Kootenays and the Boundary Country, which leaves the rest of the province open, with little competition. The sale by Jeff Hoare in 1996 of Saul Hendler's collection, which included the old time collection of Allan Fargeon, clearly showed the strong bias for the Kootenay tokens as a number of rare and desirable pieces exceeded estimates by significant amounts while tokens from other parts of the province were relative bargains.

Ronald Greene was aware of the value of a database as early as 1980 but it was not until he obtained a computer that he first attempted to produce a database. Criteria for listing medals and tokens were established, comparing similar work done by the ANS and a program was custom written in 1984. Unfortunately the first computer had inadequate capacity and an operating system that was not compatible with anything else, so when it died -- as be assured all computers do in time -- the program became non-functional. In the early 1990s a database program, Microsoft Access, came on the market and with the advent of computers of adequate capacity at an economical price the database concept was reactivated. Without a supplement since 1984 the existing catalogues were out of date. The thought was to develop a database that would be capable of growing into the future. Using Microsoft Access a trial program was established -- fortunately no programming skills were needed -- which was then modified, and in 1997 a start was made on entering the data, hopefully incorporating all sources of material, and working with the largest collections so that the entries could be checked against the vast majority of the pieces. Early on both Tony Thomson and Les Hill made significant contributions to the database by checking pieces, commenting on many of the assumptions made by RG, correcting errors, suggesting improvements and without their assistance the accuracy would have suffered. Then Tony began the tedious task of cross-checking every entry. He passed away in June 2016.

We have also found and corrected a few errors, and undoubtedly have introduced new errors for the reader to find. Sorry, we don't give bonuses for errors found, but we would appreciate hearing about them so that we can make the appropriate corrections.

The database contains 6,452 entries as of January 2025. The digital edition is complete with images that were available to us at the time of issue.

## Technical Information

The database program used is Microsoft Access 2013. The digital version with images uses Microsoft Word 2019 and the website version has been converted to .pdf for addition to the Canadian Numismatic Resource website ([www.cnr-rnc.ca](http://www.cnr-rnc.ca)). The intention is to update the database annually as long as we are able to do so. There is no intention of producing a paper based version.

## Data Fields

### 1. Region

This will not be printed, but can be used to provide a listing of a specific region

<i>Boundary</i>	an area west of the Kootenays, bordering on the U.S. Includes Phoenix, Greenwood, Grand Forks
<i>Kootenays</i>	including East and West Kootenays, Cranbrook, Revelstoke, Nelson, Rossland, Trail
<i>Vancouver Island</i>	including the Gulf Islands. Victoria and Nanaimo are the main components
<i>North</i>	anything bordering on the Skeena and north, Prince George, Prince Rupert, Dawson Creek, Liard
<i>Lower Mainland</i>	extending from Lund, Powell River, Tsawwassen, and up the Fraser Valley as far as Hope, of which Vancouver is the largest component
<i>Okanagan</i>	the Okanagan Valley communities from Osoyoos north to Salmon Arm
<i>Interior</i>	this includes the rest of the province, Kamloops, Quesnel, the Cariboo and the mid-coast. The name is perhaps not the best, but it is functional.
<i>General/Stock</i>	tokens which are/may be used across regional boundaries

A *General Token* is one used by the issuer named on the token at more than one location within the province or in more than one province. Examples are the N.A.D.P. tokens also used in Alberta and the Johnny Zee's tokens used in several outlets.

A *Stock Token* is one used by one or more issuers other than the original issuer named on the token or a token without a named issuer shown. The name of the equipment may be on the tokens, rather than the name of the user. An example would be the Ballomatic Golf Ball dispenser tokens used at various driving ranges.

### 2. Catalogue Number

Generally these are numbers assigned in Les Hill's 1994 listing. General use tokens are given a four digit number for the issuer plus a letter for the token. Tokens from a specific community have a letter prefix, such as "S" for Salmon Arm. Where we have added a number after the letter that identifies the token, such as S4550a2, it implies a piece with some minor variation, such as a plastic token missing the reverse printing or an off-metal striking. We have had to change the token letter for a few pieces. After z Les used *aa*, but unfortunately the Microsoft Access program inserts *aa* between *a* and *b* so we have added a new issuer number and continued on with *a, b, c, etc.*, e.g. Nanaimo Bathtub series N1210z is followed by N1211a. An *R* after the letter indicates a restrike. In 1994 Les separated the stock tokens with a + sign and moved them to the end of the listings. We have changed the + sign to a Z, so +0572 becomes Z0572.

To conform more with the practice of other cataloguers, tokens modified by a *subsequent* user have been placed immediately following the original issues and the issuer noted. Among those so moved were the Royal Dairy pieces cut, clipped or drilled by NOCA, the Northwestern Creamery pieces holed by Silverwood, the McEwing pieces used by the various operators of the Fernie Bakery and the Milky Way Dairy tokens used by Deanston Dairy. Pieces modified by the *original* issuer are treated as variants, e.g. V8060a, if holed to show a change to metric, becomes V8060a2.

We have also come to realize that the method of manufacture of plastic tokens produces many very small differences. We have changed existing variety designations only to locate minor varieties next to the related piece(s) and have noted when this has been done. If two plastic tokens have the same line description, but vary in the spacing, letter size, or colour of material they will qualify to be, for example, *a* and *a2*. Metal tokens struck from the same dies in different metals would also qualify as *a* and *a2*. The Vancouver Poppy Fund, Fernie Bakery, and Princess Cruises have been restructured to arrange the pieces in a more organized manner. The Squamish Trade Dollar series has been revised due to varieties discovered when cross-checking. The Kimberley Bavarian Society has been re-lettered from "e" onward because of new varieties brought to our attention. Some other series have been adjusted, but not as radically. A few issuers have been relocated, such as the West Point Grey Bakery, now listed under Point Grey which was a separate municipality when the token was issued. A municipality like Surrey has a number of historical centres such as Cloverdale and Newton and tokens are listed under the historical centre rather than Surrey if that name appears on the token. Central Saanich and North Saanich are separate municipalities from Saanich (unlike North Burnaby which is a part of Burnaby). Central Saanich tokens are listed under Saanichton which is the historical business centre

for the municipality. We have renumbered North Vancouver as too many tokens have turned up for the spaces originally allocated.

Most of the gaming pieces issued by casinos have been renumbered as the first attempts to establish catalogue numbers were inadequate. Earlier catalogue numbers may not be compatible with those assigned since March 2006.

We have included a number of cardboard tokens. To differentiate card tokens from tickets we have included only those pieces which we believe were intended for more than one-time use, which most paper/card tickets were not.

### 3. Category

Some catalogues only list trade tokens, others only dairy tokens, etc. Some collectors collect only one category. The database includes many different items, some undoubtedly with less numismatic content/interest than others, but the thought was that including some marginal pieces will provide a service for those discovering such pieces. One should not feel obligated to collect everything listed, only what is of interest. The original database allows us to sort the tokens by category if desired and any given token is entered into *one* of the following categories:

<i>advertising</i>	some commemoratives fall into this category. At some point a commemorative piece might be better described as a medal, rather than an advertising token. The boundary between is fuzzy and for the time being arbitrary. A piece is certainly considered an advertising token when the commercial aspect is pre-eminent
<i>arcade</i>	modern tokens used in video game arcades, entertainment centres and amusement rides. Some cataloguers call these <i>amusement</i> tokens
<i>bakery</i>	denominated in loaves of bread
<i>bar</i>	tokens good for a drink at a club (as opposed to drink tokens used by saloons or other commercial establishments which are listed under <i>trade</i> ). Tokens used at beer gardens, events, and promotions by non-profit groups are included in this category
<i>car wash</i>	good for a car wash or a car wash discount
<i>credit</i>	for pieces which acted as credit identification for the bearer, (McLennan, McFeely, & Prior Limited and David Spencer Ltd.)
<i>dairy</i>	denominated in pints, quarts, litres, etc., of milk
<i>fare</i>	good for a ride or a ride discount (but not amusement rides)
<i>gaming</i>	pieces used for gaming, generally without value away from the table, and the newer slot machine tokens, some of which are also valid at the tables. Some game chips bear so little information that they are unidentifiable as to issuer and have not been listed
<i>golf</i>	good for a bucket of balls at a driving range, putting green, etc. and later ball markers
<i>machine</i>	early slot machine tokens without expressed denominations and other tokens used in machines, lockers, etc., but not in arcades, casinos, golf ball dispensers, telephones, parking machines, or car washes, all of which have their own category
<i>parking</i>	parking machines
<i>school</i>	used in school lunch programs or for teaching purposes
<i>souvenir</i>	all so-called trade dollars, and the related off-metal strikings. We have relied upon Serge Pelletier's work for listing a number of minor varieties and restrikes. Except for Nanaimo and Port Alberni where we have conflicting information, we have also accepted his quantities
<i>telephone</i>	pay telephones
<i>trade</i>	generally has a value expressed on the token, and used for transactions
<i>miscellaneous</i>	any token that does not fit into one of the above categories [abbreviated as <i>misc</i> ].

By manipulating the original database program we can produce a list for any specific category if so desired, or can eliminate a category (for instance, this is useful if you don't collect souvenir pieces and don't want your catalogue bulkier than necessary). We can also produce various other lists, e.g. a list of all those tokens with 6¼¢ denominations, or tokens with holes which are not round, if for some strange reason such a list is desired. We can also produce lists of specific issuers, such as Great Canadian Casinos, Elks or Royal Canadian Legion, etc. However these individual requirements take time to prepare and produce and we will do them in exchange for a donation to either the J. Douglas Ferguson Historical Research Foundation, or CAFNE. Ask Eric or Ron in advance.

### 4. Identification Number

This column will be suppressed and will not print, but it helps us find a piece which has been added to a series at a later date. It is generated by the database program when tokens are added to the listing. It serves as an acquisition number and gives a count of the number of tokens listed.

## 5. Issuer

Provides the issuers' names, which in some cases are not on the tokens, so that we can access the listing by issuer, e.g. Royal Canadian Legion where only the Branch # is on the token. We have abbreviated the proper names of service clubs here to conserve space, e.g. B.P.O.E. Lodge 26, although the listings are alphabetized under the proper name, i.e. Benevolent Protective Order of Elks. It has been our standard practice in B.C. that if both a company name and an individual's name are on the token we list under the company name.

## 6. Obverse

Generally a line description of the side where the issuer's name appears. Regarding the line descriptions, items shown in brackets are either an image such as an (eagle), a (logo), or (an uncertain description), which should be easily differentiated. Where we have run out of room in our original database field size we indicated omitted text by three dots (...). Square brackets [ ] insert our comments, such as [sic] to note an error in spelling.

## 7. Reverse

Generally the denomination side. If the reverse is blank, the token is referred to as (*uniface*). If the reverse is the same as the obverse, the token is referred to as (*bifacial*).

## 8. Additional

Further information to describe or differentiate varieties, etc. Mint marks are mentioned where present. See below for a general discussion of *Mints and Mint Marks*.

## 9. Dates of use

The dates refer to the period the tokens were used, when known. If the dates of use are not known, the dates given refer to the years of operation of the issuer, indicated by a "z" after the dates.

## 10. Material

Using standard symbols. Metal tokens are usually embossed (i.e. raised letters) and are marked *incuse* if the design is sunk into the surface. On the other hand, plastic and fibre tokens are usually incuse, and are marked *embossed* if the design is raised.

## 11. Shape

Using standard abbreviations, shapes are described and illustrated below.

## 12. Size in millimetres

Measurements originally were to the nearest ½ mm. We have converted measurements to a single decimal place, i.e. 38.2, but individual pieces can and do vary in diameter, especially plastic pieces which do not have the dimensional stability of a metallic piece. Loops are only measured if they are integral to the piece, not if they are added. Laminated pieces (LP) that we have seen often vary in size from one to the next. We have taken the measurements of those pieces in our collections. For round pieces we measure across and also up-down. We record the larger dimension. e.g. 38.32↔, 38.37 ↑ is recorded as 38.4, 38.32↔, 38.34 ↑ is recorded as 38.3.

## 13. Have

[ ] A space intended for the user's convenience for recording their own holdings.

## 14. Number known

We use the standard Rarity Scale where larger quantities are known, thus:

R10	one known	R5	21 to 30 known
R9	two known	R4	31 to 40 known
R8	three to five known	R3	over 40 known
R7	six to ten known	R2	obsolete, not destroyed
R6	11 to 20 known	R1	currently in use

However, for the rarer pieces we have used Les Hill's method which we find more useful. 8/7 means 8 known, of which 7 are in collectors' hands and the 8th is in a museum or institutional collection; 2 means 2 known. These figures should be taken advisedly as there has been a lot of swapping since Les Hill's last census and some tokens may have been counted more than once and others missed. If known, the number of pieces struck is shown.

Modern plastic tokens, particularly dairy tokens, were produced in large numbers which were often or generally destroyed when the dairy closed. Casino chips are often withdrawn and replaced with later issues. The earlier issues cease to have any further value at the casino when replaced.

## 15. Comments

This field is where we have added anything else of interest that doesn't fit in any other field. References to articles about the tokens are given here. *Transactions* is the *Transactions of the Canadian Numismatic Research Society*, a publication that was available to non-members at the end of each year. It was published from 1965 until 2001 and 2013 until 2022. *CeeTee* is the common nickname for *The Canadian Token*, published by the Canadian Association of Token Collectors from 1972 to 2001. In 2002 the *Transactions* and the *CeeTee* were amalgamated as *Numismatica Canada*, which is abbreviated as *NumisCan*. *CNJ* is the *Journal of the Canadian Numismatic Association (since 2008 The Royal Canadian Numismatic Association)*. *Vintage & Mintage* is the newsletter of the Victoria Numismatic Society. The *Shoreline*, shown as *NSNS*, is the publication of the North Shore Numismatic Society. The Vancouver Numismatic Society News Bulletin is shown as *VanNS*. Before 1961 it was known as the Vancouver Coin Club, given as *VCC*. *Transportation Tokens of British Columbia* is shown as *TTs of BC*. *Tokens, Trade Dollars and other Numismatica of the Alberni Valley*, published by the Alberni Valley Coin Club is shown as *AVCC*. *Alaskan Token Collector & Polar Numismatist*, published by Alaska Rare Coins, is shown as *ATC&PN*. Where articles are repeated we have shown only the more widely circulated source.

Breton, in his *Illustrated History of Coins and Tokens relating to Canada* of 1894 listed four tokens, which we show as Br. 936, etc. The W.R. McColl Sale of 1903 listed just over two dozen pieces, which we show as McC. 229 or McColl 229, etc. The *Atwood-Coffee Catalogue of United States & Canadian Transportation Tokens* lists a number of pieces, which we show as Atwood 300-A, etc. Some longer articles published in the *Transactions* or *NumisCan* are posted on Ron's website Greene Frogge Press ([Greenefrogge.ca](http://Greenefrogge.ca)).

### Conventions

We have followed a convention of capitalizing the initial letter of each word of a line description, thus Good For 25¢ In Trade, but where the word *cents* as in Good For 25 cents In Trade; *of* as in Loaf of Bread, *or* as in Good For 1 Drink or Cigar, appears in a much smaller font than the other words, we have indicated this by using lower case for the initial letter.

We have not used the standard chemical symbols for elements since many tokens are made of alloyed materials which do not have standard abbreviations. Rather, we have used the *Standard Format & Symbols* as adopted by the Canadian Numismatic Research Society in 1968 with additional symbols.

### Mints and Mint Marks

Not all makers signed their tokens, but some tokens carry mint names or marks:

Hoffman & Hoffman	a one-time California maker of tokens. The mark is HH and a change of name to Hoffman Mint has resulted in the mark becoming HM. Later, moved to Florida.
Jacoby Bros. Ltd.	a lamp and initials J.B. appear on the 47th Regimental Institute pieces of New Westminster
Lawrence Medallie Art	when Sherritt Mint (see below) decided to terminate medal/token manufacturing their presses were sold to their eastern Canada representative, Glen Trenchard. (1946 – 2019).

	Lawrence “Larry” Coburn was a partner in the venture. He was the technical man, creating the artwork and dies.
Mississauga Mint	an “M” within a circle
Osborne Coinage	OC, overlapping. Purchased Roger Williams Mint in 2006
Pressed Metal Products	uses a PMP logo, in which the first "P" is reversed and all letters are conjoined. Only a few PMP pieces have a mint mark. The business was closed in 2017.
Roger Williams Mint	a token manufacturer from Attleboro, Ma., whose mark is RWM. Purchased by Osbourne Coinage in 2006.
Sherritt Mint	the mint mark used is a hexagon with a horizontal line through it that resembles the Greek letter <i>Theta</i> . We have used the character "ø" to indicate the Sherritt Mint mark. Pieces which are 32 to 33 mm in diameter and magnetic (N, NBS or AS) are generally Sherritt Mint products. Production of tokens ceased August 31, 1995.
Thistle Rubber Type Co.	made only a few tokens for B.C. merchants. No mint mark used. Mel Kyle wrote a series in the <i>CeeTee</i> on pieces produced by this company, based on the ledgers which have survived.
Tokens Direct	uses a T <sub>D</sub> mint mark - a division of Osborne Coinage. Took over Roger Williams Mint in 2006

A number of makers write their names out. Where these names appear they are always in very small letters, thus:

J.C. Irvine	a San Francisco token maker, active from 1886 to 1906
Lombardo	a Sherbrooke, Quebec token manufacturer who used several different styles of signature, most commonly Lombardo Sherbr. Q and occasionally LM with the “M” nestled inside the “L”. In business under the Lombardo name from 1960 to 2005 when purchased by the Mississauga Mint
L.H. Moise	a San Francisco token maker, 1893 to 1897
Moise-Klinckner	the successor to Moise, active 1898 to 1930
N.W. Stamp Wks.	North West Stamp Works, St. Paul, Minnesota.
Pritchard & Andrews	an Ottawa maker, active 1887 to at least 1955
Vaas & Co.	a Seattle stamp maker that also made some B.C. and Yukon tokens, active 1890’s until the early 1930’s. Their name is on some tokens, and others have unique ornaments believed to be used solely by Vaas & Co. (NumisCan, 2024, pp 5 -7)

(Notes on Irvine and Moise taken from *California Tokens* by the late Charles V. Kappen.)

A number of modern plastic tokens have an embossed logo, consisting of a “p” with a dot within the loop of the “p” and the words Promo Plastik below. These tokens appear to have been made from blanks provided by Promo Plastik. Without exception, these have an embossed denticled rim much like a poker chip and are 38 mm in diameter. Promo Plastik is located in Saint-Jean-Port-Joli, Quebec 1992-present.

### **Token Locator**

In those cases in which the town or locality is not specifically shown on the token we have listed the piece in the token locator. If the token bears a regional name such as Vancouver Dairy or Vancouver Golf Club and is from Vancouver we have not entered it in the token locator. First look in the database under the regional name that appears on the token, (i.e. Vancouver) and if the token is not listed, then refer to the token locator. In this example, Vancouver Dairy would be found in the *Vancouver* listing and Vancouver Golf Club would be found under *Coquitlam*.

A numerical listing of the Elks chapters in Canada appears in the *CeeTee* 1990, p. 77. It has been compiled from *A History of the Elks of Canada, 1912 - 1987*, which was published by the Order. There is also an article by Norman W. Williams, *Drink Tokens of the Elks Clubs of Canada, Transactions* 1973, p. 45.

The following is an explanation of the abbreviations used in the database to describe the various B.P.O.E. logos appearing on the tokens. Minor variations may exist.

Logo 1

The throat is unmarked

Logo 2

The throat is coloured, usually with a white flash just to left of centre (as viewed)

Logo 3

This appears only on 42½ mm tokens and is embossed.

Logo 4

Small head flanked by letters, "B.P." and "O.E."

Logo 5

Clock to the side, "Canada" below

Logo 6

Round Logo, variations exist

Logo 7

Clock centered, "Canada"

Logo 8

"Canada" on a ribbon

## SYMBOLS AND ABBREVIATIONS

<b>MATERIALS</b>	Standard	(written all upper case)
Aluminum	A	
Anodized Aluminum	A(colour)	e.g. Ar = red anodized Aluminum
Aureate Steel	AS	
Bimetallic	BM	(Bronze in an Aluminum ring unless otherwise stated)
	BM-(inner material)-(outer)	e.g. BM-N-B = Nickel in a Brass outer ring
Brass	B	(yellowish in colour), (includes so-called "Commercial Bronze")
Bronze	BZ	(reddish in colour)
Cadmium	CD	(known only as a plating material, a matte finish)
Card	CA	
Celluloid	CE	
Ceramic	CR	
Clay	CY	
Clay with Metal Inlay	CMI	(a Stainless Steel inlay unless otherwise stated)
Copper	C	(Bronze is almost identical in appearance and is more likely to be used. If we do not know we call the material Bronze)
Cupro Nickel	CN	
Fibre	F	
German Silver	GS	(circa WWI renamed Nickel Silver)
Gold	G	
Iron (or Steel)	I	(magnetic)
Lead	L	
Leather	LE	
Nickel	N	(magnetic, when used as a planchet) (when used as a plating material the appearance is usually a shiny finish)
Nickel Silver	NS	(non-magnetic)
Nickel Bonded Steel	NBS	(magnetic)
Paper	PA	
Plastic solid	P(colour)	e.g. Pr = red plastic
translucent	tP	e.g. tPr = translucent red plastic
laminated	LP	(material 2 or 3 ply, with different colours)
Rhodium	RH	(known only as a plating material, finish is shiny, silvery)
Silver	S	
Silver plated Bronze	SpBZ	
Stainless Steel	SS	
Tin	T	(pure Tin; tin plate listed as Tpl)
Vulcanite	V	
White Metal	WM	(Pewter and other Tin based alloys)
Zinc	Z	(mostly used as a plating material, appearance is a dull finish)

### FINISHES

Plated	(plating material) p (under-material)	e.g. SpBZ = Silver plated Bronze
	(if under-material not known)	e.g. Sp_ = Silver plated
Antiqued	a(Material)	e.g. aB = antiqued Brass
Enamelled	e(Material)	e.g. eBZ = enamelled Bronze

### MIXTURES

Clay game chips with inserts of various colours      CY(main colours), (not all colours are listed)

Many cataloguers have used White Metal (WM) as a catch-all and have listed NS, CN and other materials as White Metal. We have restricted the use of WM to Tin based alloys.

## COLOURS

	Standard	(written all lower case)
Azure	az	
Beige	be	(light greyish brown)
Black	k	
Blue	b	
Metallic Blue	mb	(metallic iridescent light blue)
Brick	br	
Brown	bn	
Cream	-	(see ivory)
Grape	gp	
Gold	go	
Green	g	
Grey	gy	
Ivory	iv	(creamy or yellowish white)
Lavender	la	
Lemon	lm	
Lilac	li	
Pink	pi	
Purple	p	(includes maroon and mauve)
Metallic Purple	mp	(metallic iridescent light purple)
Orange	o	
Red	r	
Metallic Red	mr	(metallic iridescent red)
Silver	s	
Tan	ta	(yellowish brown)
Turquoise	tu	
White	w	
Yellow	y	

Colours shown as: material/letters and design  
e.g. Pr/w is a red plastic piece with white letters  
CEr,y/w,k is a celluloid piece. If two-sided, red obv., yellow rev., with white letters on obv., and black letters on rev.  
However, if uniface, then w and k letters on obv.

## MISCELLANEOUS

obv	obverse	(generally name side of token)
rev	reverse	(generally denomination side)
incuse	letters, design cut into token	
embossed	letters, design raised	
uniface	one side is blank, or only the maker's name, in small letters, is shown on one side	
bifacial	both sides are identical	
/	change of line	
( )	description of logo, object or design	
...	description omitted	
[ ]	descriptive comment	i.e. [sic] e.g. "Bakrey [sic]" indicates misspelling of the word "Bakery"
c/s	counterstamped, a number or letter punched into the piece	
ø	the available symbol closest to the Sherritt Mint Mark which is a hexagon with horizontal bar, similar in appearance to the Greek letter Theta	
DRB	David R. Byard	
LCH	Leslie C. Hill	
RG	Ronald Greene	

Number known / available 7 / 6 total known (including museums)/available to collectors, in this case 7 known, 1 in a museum, 6 in collector's hands

## SHAPES

## Standard

Bear Shape		BS	(rounded ears)
Cat Head		CH	(with two lobes [ears])
Cat Head		CH3	(with a third lobe )
Cloverleaf		C	
Cloverleaf, square		CS	
Cloverleaf, with lobes		CL	
Dodecagonal		D	(12 sided)
Heart Shape		HS	
Hedecagan		He	(11 sided)
Heptagonal		Hp	(7 sided)
Hexagonal		Hx	
Horseshoe Shape		Hsh	
Irregular or Odd		Irr or odd	
Lobed		L	
Octagonal		O	
Oval		V	
Owl Shape		OS	(pointed ears)
Round Owl		RO	
Pentagonal		P	
Rectangular		Re	
Round		R	
Round, with a central hole		Rh	
Round, with an off-centre hole		Rp	
Round, with notches		Rn	
Scalloped		Sc	(8 assumed)
Scalloped		Sc11	(with # of scallops, e.g. 11)
Square		S	
Square, with notches		Sn	
Tee Shape		TS	
Triangular		T	
looped	(suffix)	l	e.g. Rl = round with a loop
holed	(central hole)	h	(holes are round unless otherwise stated)
shape of hole	(suffix)	h-s	e.g. Sch = scalloped (8) with a central hole
hole shapes	(if not round)	h-	e.g. Rh-s = round with a square hole
		h-5	(shape given in comments if not standard)
		h-W	hole is the shape of a "5"
			hole is the shape of a "W"
pierced	(holed off centre)	p	
	more than one hole	p(number)	e.g. p2 for 2 holes
cut, clipped	(suffix)	c	
uneven	(prefix)	u	e.g. uR = uneven Round
mm	millimetres	all dimensions given to the near tenth of a millimetre.	
		if between 23.95 and 24.04 shown as 24.0 mm	
		if between 24.05 and 24.14 shown as 24.1 mm	
		if between 24.95 and 25.04 shown as 25.0 mm	

Measurements of rectangular, oval, uneven triangles and other shapes may require two dimensions: with the token in normal reading position, read horizontal dimension first, vertical dimension second

The normal order used is: Material:Shape:Size

e.g. tPr/w:Rh-s:38.5 = a translucent red plastic token with white letters, round with a square hole, 38.45 to 38.54 mm in diameter

B:Sc:34.0 = a brass token, 8 scallops, 33.95 to 34.04 mm in diameter

SHAPES (Illustrated)

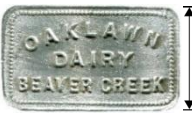

Dimensions determined by normal reading position (A & B)

R - Round 	Rh - Round Holed 	Rp - Round Pierced 	Rn - Round Notched 4 	Rn5 - Round Notched 5 	
					

Sc - Scalloped Normally 8 	Sc9 - Scalloped 9 	Sc10 - Scalloped 10 	Sc11 - Scalloped 11 	Sc11 - Scalloped 12 	
					

C - Cloverleaf 	CL - Cloverleaf With Lobes 	CS - Cloverleaf Square 	S - Square 	Sn - Square Notched 	
					

Re - Rectangular 	Re - Rectangular 	V - Oval 	V - Oval 	T - Triangular 	
					

O - Octagonal 	P - Pentagonal 5 Sided 	Hx - Hexagonal 6 Sided 	Hp - Heptagonal 7 Sided 	He - Hedecagon 11 Sided

**British Columbia**

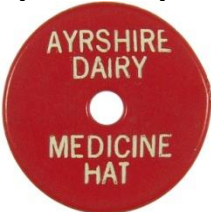

**British Columbia** (commonly abbreviated as **BC**) is the westernmost province of Canada. Situated between the Pacific Ocean and the Rocky Mountains, the province has a diverse geography, with rugged landscapes that include rocky coastlines, sandy beaches, forests, lakes, mountains, inland deserts and grassy plains. British Columbia borders the province of Alberta to the east, the territories of Yukon and the Northwest Territories to the north, and the US states of Washington, Idaho and Montana to the south and Alaska to the northwest. With an estimated population of over 5.5 million as of 2023, it is Canada's third-most populous province. The capital of British Columbia is Victoria, while the province's largest city is Vancouver. Vancouver and its suburbs together make up the third-largest metropolitan area in Canada.

#### Sic Bo

Sic Bo is an ancient Asian game of chance and translates roughly as Dice of Fortune. A variation of this popular and entertaining game has been adopted by Great Canadian Casinos.

The game is played with three solid balls and a roulette type wheel. The wheel has 36 slots, the numbers 1 through 6 are represented equally 6 times, simulating dice.

The balls are rolled down a guideway and into the wheel. Winning bets are determined by the total number and the combination of where the balls land.

### North West Indian Cultural Society

There three series, the first produced in 1977 tokens **a** to **e** were available in pure Nickel, .999 fine silver and 24K gold. All three were struck from the same dies. In series II, from 1978, tokens **f** to **j** were struck in pure Nickel. In this year there were medals, not souvenir trade dollars, with different die work. The medals were offered in .999 fine silver and 24K gold. As these medals complement the series we have included them in this catalogue. The cost of the second set of dies that year must have reduced the return for the society as the series III, from 1979, eliminated the gold specimens and the .999 fine silver tokens were the same dies as the pure Nickel tokens. There were only three different tokens in this final series, **k**, **l** and **m**.

6310  
info

There were also a few off-metal strikings that Serge Pelletier mentioned in his trade dollar catalogue. In the first series there are two NBS strikings reported, 6310c5. In series II there are Nickel Silver pieces recorded which can be differentiated from the Nickel strikings as they would not be attracted by a magnet while the Nickel strikings would be strongly attracted by a magnet.

-------------------------	---------------------------	--

### Abbotsford

Situated 81 km (50 miles) east of Vancouver and 5 km (3 miles) from the Canada/US border, it is the hub of the lower Fraser Valley, named after H. Abbott of the C.P.R.. It is strategically located on the Old Yale Road and the present #1 Highway, and also on railways past and present – the B.C. and Bellingham Bay Railway from Mission to Bellingham - the B.C. Electric Railway(now the B.C. Hydro) from Vancouver to Chilliwack – the Vancouver, Victoria and Eastern (C.P.R.) branch from Aldergrove planned to pass via Hope, Princeton, Keremeos and on to Midway and Spokane.

## Cranbrook

Established in 1898 when the C.P.R. selected this site for its railway divisional site instead of Fort Steele as had been anticipated. It was named by Col. Jas. Baker who owned much of the land in the area. The first train arrived from Lethbridge, Alberta in 1898.

## Dease Post

### Dease Post

In 1837 a [Hudson's Bay Company](#) post, known as [Lake House](#), was created by [Robert Campbell](#) on the shore of Dease Lake about 50 km (31 miles) north of the [Stikine River](#) and 150 km (93 mi) south of where the present day [Alaska Highway](#) passes. The Lake had been named in 1834 for [Chief Factor Peter Warren Dease](#), and would become a major junction for miners travelling to the gold rush in [Cassiar](#). Although the fort was abandoned soon after, the town based around the fort lived on, and was renamed Dease Lake in 1934 by then-Chief Trader John McLeod.

During the 1960s and 1970s, [BC Rail](#) started to build an extension of their line towards Dease Lake, but construction was halted. Grading was completed all the way, and can still be seen from the air. [Wikipedia](#)

## Eburne

### Eburne

A community on both sides of the north arm of the Fraser River and on Sea Island; partly in Richmond and partly in Point Grey Municipality. The Vancouver and Lulu Island Railway (leased by CPR to BCER for tram service) crossed the river at this point and continued on to Steveston. The Point Grey section of Eburne was renamed Marpole in 1916, in honour of a CPR official, and became a part of Vancouver when the amalgamation of Point Grey, South Vancouver and Vancouver took place in 1929.

## Fernie

**Fernie**

Named after Wm. Fernie who brought the rich coal deposits to light. It is situated in the southeast corner of B.C., 63 km (33 miles) from the Alberta Border. Fernie owes its prosperity to the coal deposits in the area which are once again being worked after being in the doldrums from 1935 to 1965. Incorporated July 28th, 1904.

## Fort Grahame Post

Catalogue Category Have	Issuer Obverse Reverse	Obverse // Reverse / Additional Comments / Material-Colour - Shape - Size - Rarity - Known/Avail - Date Of Use
<b>Fort Grahame Post</b>	<p>Fort Grahame was established on the Finlay River in 1872. In 1893, the McConnell party explored the area from Ft. Grahame to Fishing Lakes on the upper Finlay River, and Mr. Fox was sent to Fort Grahame as the fur trader. Built on the east bank of the river, the post was named after James Graham, a senior officer with the Hudson's Bay Company. The first sawmill north of Prince George was at Fort Graham in the 1920s. The sawmill had a 4 Horsepower motor and a 10 inch Edgar blade. The fort served the local Sekani First Nations until it closed in 1948.</p>	
4292 trade info	<p><b>Hudson's Bay Company</b> [see listings under General 4292], [on Finlay River, north of confluence with Peace River]</p>	

## Fort Langley

<b>Fort Langley</b>	<p>Fort Langley is a village community in the Township of Langley. It has a population of 3,400. It is the home of Fort Langley National Historic Site, a former fur trade post of the Hudson's Bay Company. Lying on the Fraser River, Fort Langley is at the northern edge of the Township of Langley. <a href="#">Wikipedia</a></p>

## Grand Forks

### Grand Forks

In the Boundary District, 120 miles (193 km) east of Vancouver and 3 miles (5 km) north of the Canada/US border. At the junction of forks of the Kettler river from which its name is derived. Incorporated on April 15<sup>th</sup>, 1897, Grand Forks owes its prosperity to the rich copper deposits in the district, and to the rich farmland in the Sunshine Valley. Prior to WW1, 3 railways served the region, the Canadian Pacific, Great Northern and Kettle River Valley Rly. Only the C.P.R. had survived, and barely at that.

## Hazelton

### Hazelton

Hazelton is situated at the juncture of the Skeena and the Bulkley rivers about 180 miles (290 km) east of Prince Rupert and it was recognized as a logical location for trade between the interior and the coastal ports of Fort Simpson and Port Essington. Thomas Hankin layed out the townsite and named the settlement 'Hazelton'. It became a focal point for several traders and merchants, including the Hudson's Bay Company, Robert Cunningham, Richard Sargent, as well as Thomas Hankin and others. When the railway came through in 1912 it did not go by way of Hazelton and the lower valley but was built on a higher elevation some 4 miles (6½ km) to the south. New Hazelton and South Hazelton sprang up on the new rail line. Often referred to locally as Oldtown, Newton and Southtown.

## Hosmer

### Hosmer

Hosmer was 9 miles (14½ km) east of Fernie and 24 miles (38½ km) west of the Alberta border, once an active coal mining community, but now a ghost town with little more than a small wayside hotel on the highway. This Elk River Inn (1962) was once the Pacific Hotel and was moved to its present location.

## Kelowna

### Kelowna

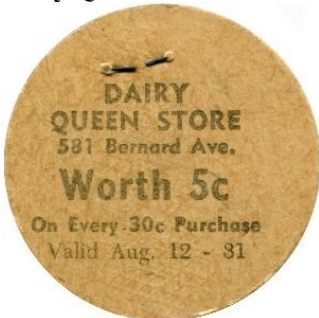

Kelowna is on the east side of Okanagan Lake, about the centre of the valley; it is a rich fruit growing and wine making region if irrigated, and also a resort city once famous for its regatta.

## Kemano

Kemano is about 400 miles (644 km) upcoast from Vancouver and it is the site of the Alcan powerhouse where power is generated and transmitted 50 miles (80½ km) overland to Kitimat for requirements of the aluminum smelter.

## Kitimat

**Kitimat**

Originally the site of a First Nations village, Kitimat is now a modern city, incorporated in 1953, after the Aluminum Company of Canada erected a smelter at the site. It is about 75 miles (121 km) southeast of Prince Rupert and 450 miles (724 km) upcoast from Vancouver.

## Langley

### Langley

A rural municipality 30 miles (48 km) east of Vancouver with Murrayville as the administrative centre. Fort Langley is on the Fraser river in the northern section of the municipality. The city of Langley once known as Langley Prairie as a tram stop, is within the bounds of the municipality but separately serviced.

## Little Fort

**Little Fort**

Little Fort is an unincorporated community in the Thompson region of south central B.C. The former ferry site is immediately west of the mouth of Lemieux Creek and on the west shore of the North Thompson River. At the BC Highway 24 intersection on BC Highway 5, the locality is by road about 93 kilometres (58 mi) north of Kamloops and 30 kilometres (19 mi) southwest of Clearwater. To distinguish the location from the main fort at Kamloops, the name Little Fort was chosen. Experiencing limited business, the trading post was abandoned a few years later.

## McDames Creek Post

Catalogue Category Have	Issuer		Obverse // Reverse // Additional Comments / Material-Colour - Shape - Size - Rarity - Known/Avail - Date Of Use
	Obverse	Reverse	

### McDames Creek Post

McDames Creek Post is an abandoned settlement in the Cassiar Country of the Northern Interior. McDame got its name from McDame Creek, which had been prospected in 1874 by Harry McDame (originally from the Bahamas, by way of California) and his partner John Giscome (originally from Jamaica). Dames Creek was the site of an 1877 find of a 72-ounce gold nugget worth \$1,300 (\$52,000 today), which was the largest in British Columbia's history. A trading post located at the creek's confluence with the Dease River, owned by Robert Sylvester, was sold to the Hudson's Bay Company in 1875 and remained in operation until closing in 1943, with the locality being abandoned by 1960. *Wikipedia*

## Mica Creek

**Mica Creek**

Mica became something of an instant townsite with the construction of the Mica Dam on the Columbia River in the late 1960's and 1970's, however soon returned to its previous status when the dam was completed. The road to Mica had to be relocated in many places when the Downey dam three miles north of Revelstoke was being built (1978-82), due to the rising waters behind the dam.

## Mirror Lake

### Mirror Lake

Mirror Lake, just 4 km (2½ mi) south of Kaslo on Highway 31, is a small community nestled on a mountainside bench on the western shore of Kootenay Lake. Nature has blessed Mirror Lake with a unique combination of a small warmwater swimming lake, the picturesque 100 km long Kootenay Lake, and the towering Selkirk and Purcell mountains that envelope it all.

## Nakusp

Catalogue Category Have	Issuer		Obverse // Reverse // Additional Comments / Material-Colour - Shape - Size - Rarity - Known/Avail - Date Of Use			
	Obverse	Reverse				
<b>Nakusp</b>	Situated between Revelstoke and Nelson at the foot of Upper Arrow Lake. The C.P.R. built a line from here to Sandon to compete with the C.N.R. who had their line from Kaslo into Sandon for hauling out the rich ores. Eventually the C.P.R. operation lifted the rails; the roadbed now forms most of the highway from Kaslo to Slocan Lake.

## Natal

Once a busy coal mining town, in the Crowsnest Pass, Natal is now almost deserted. When the coal mining began again in the late 1960's, the new town of Sparwood was created to provide a better living area for the employees.

### Newton

A culturally diverse community, Newton is home to the region's largest South Asian community and the heart of South Asian eats, clothing, and jewellery shops. Every year Newton hosts one of the largest Vaisakhi Parades outside of India, welcoming more than 400,000 people. Newton also includes the historic village of Sullivan.

### North Saanich

The District of North Saanich is located on the Saanich Peninsula, approximately 25 km (16 mi) north of Victoria on southern Vancouver Island. The district is surrounded on three sides by 20 km (12 mi) of ocean shoreline, and consists of rural/residential areas and a large agricultural base. It is home to the Victoria International Airport and the Swartz Bay Ferry Terminal.

# Okanagan Falls

Catalogue Category Have	Issuer		Obverse // Reverse / Additional Comments / Material-Colour - Shape - Size - Rarity - Known/Avail - Date Of Use			
	Obverse	Reverse				
<b>Okanagan Falls</b>	A community located on the south end of Skaha Lake. The community was founded in 1893 as Dogtown. The current name derives from a small set of the falls that used to lie on the Okanagan River at the outlet of Skaha Lake. The falls have since been submerged beneath the lake due to the construction of a dam on the river.

<b>Phoenix</b>			
<b>Phoenix</b>	Phoenix is a ghost town in the Boundary Country, 11 km east of Greenwood. Once called the "highest city in Canada" by its citizens (1,412 metres / 4,633 feet above sea level) it was a booming copper mining community from the late 1890s until 1919. In its heyday it was home to 1,000 citizens and had an opera house, twenty hotels, a brewery and its own city hall.		
P3840 info	<i>"The Tokens of Greenwood and Phoenix, British Columbia "</i> by Ronald Greene CNRS Occasional Paper No. 1, 1993

## Point Grey

**Point Grey** Point Grey is a headland marking the southern entrance to English Bay and Burrard Inlet. The headland is the site of Wreck Beach, Tower Beach, Point Grey Beach and most notably, since 1925, on its top is the Point Grey Campus of the University of British Columbia. The name Point Grey is often used as a short form for the Vancouver neighbourhood of West Point Grey. It was named by Captain Vancouver for his friend Captain George Grey. The Spaniards, a year earlier, had named it Punta de Langara in honour of Admiral Don Juan de Langara.

## Port Guichon

### Port Guichon

This historic place is formerly the site of the commercial and port installations of Laurent Guichon. Today it is part of the dike of the neighborhood that still bears the name. The house on the property remains the residence of one of Guichon's descendants. This place is valued for its association with Joseph Guichon, from Chambéry, France and his family. The Guichon family played a significant role in the development of the cattle farming industry in B.C. The family is also linked to a historic hotel in New Westminster and other businesses, and part of early economic development in British Columbia.

### Powell River

Powell River drains Powell Lake into Georgia Strait some 80 miles (129 km) upcoast from Vancouver. Both named after Dr. Israel Wood Powell of Victoria, in 1880. He was prominent in politics and Fraternal organizations. The area was selected for the town due to the power potential of the river, necessary for the huge pulp mill planned and eventually erected.

## Premier

### Premier

Located on the eastern slope of the Salmon River Valley, Premier Mine was started in 1910. By 1918, Premier had developed into one of the richest mineral deposits in B.C. An 11 mile (17 km) aerial tramline was constructed to carry ore from Premier to tide water and was one of the longest on the continent at that time. In 1921 the property shipped 6,000 tons of ore with the gold valued at \$1,500,000 (1921 dollars).

### Quadra Island

Quadra Island is a large island off the eastern coast of Vancouver Island. It is part of the Discovery Islands, in the Strathcona Regional District. In 1903, the island was named after the Peruvian Spanish navigator Juan Francisco de la Bodega Quadra, who explored and settled the Vancouver Island area in the late 18th century.

## Quesnel Forks

Quesnel Forks, historically Quesnelle Forks, also simply known as "The Forks" or grandly known as "Quesnel City" is a ghost town in the Cariboo region. It is located at the junction of the Quesnel and Cariboo Rivers and is 60 km southeast of Quesnel and only 11 km northwest of Likely. Quesnel Forks was founded in 1860 and was a major supply centre for the Cariboo Gold Rush.

### Revelstoke

A divisional point on the C.P.R. main line 400 miles (644 km) northeast of Vancouver, and 260 miles (418 km) west of Calgary. Formerly known as Farwell until 1886, then renamed Revelstoke and incorporated as a city on March 1st, 1899. The golden spike driving, which signified the completion of the railway, was done by Sir Donald Smith at a point near Craigellachie, 30 miles (48 km) to the west of Revelstoke.

## Rossland

### Rossland

Some 470 miles (756 km) east of Vancouver and 10 miles (16 km) north of the Canada/US border, a prosperous mining center during the 1890's and for the next 20 years. It was named after Ross Thompson who had much to do with laying out the townsite in 1894. Inc. as a city on March 18th, 1897, it is now mainly a residential suburb of Trail, 5 miles to the east.

## Sandon

### Sandon

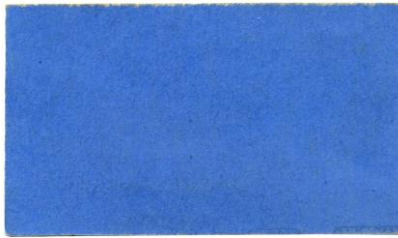

Sandon was the location of rich silver ore deposits which were mined in the 1890's and early part of this century. It is about 100 miles (160 km) north of Nelson and was served by the Great Northern Railway from Kaslo, and also by the C.P.R. from Nakusp. Incorporated as a city on January 1st, 1898, almost destroyed by fire in 1900, then rebuilt. It went into the doldrums when the metal prices declined, and was finished off with the 1955 flood.

## Sparwood

### Sparwood

The District Municipality of Sparwood was incorporated on May 12th, 1966, to provide a modern living and business community for employees of the new coal mining companies. The older towns of Natal and Michel were dismantled. Sparwood is about 15 miles (24 km) west of the BC/Alberta border.

<b>Trail</b>	Trail, the site of one of the world's largest smelter is 628 km (390 miles) east of Vancouver and 24 km (15 miles) north of the International border. Incorporated as a city on June 14th, 1901, Trail came into prominence in 1895 with the erection of a smelter to process the ores from the nearby mines in Rossland, and other mining camps in southeastern B.C.

### Tumbler Ridge

Tumbler Ridge is a planned community with the housing and infrastructure construct built simultaneously in 1981 by the provincial government to service the coal industry as part of the British Columbia Resources Investment Corporation's Northeast Coal Development. The townsite is located near the confluence of the Murray River and Flatbed Creek and the intersection of Highway 52 and Highway 29, 120 km (75 miles) southwest of Dawson Creek.

## Valemount

Valemount is a Village municipality in east central B.C., 320 km (200 miles) from Kamloops. It is between the Rocky, Monashee and Cariboo Mountains. It is the nearest community to the west of Jasper National Park, and is also the nearest community to Mount Robson Provincial Park, which features Mount Robson, the tallest mountain in the Canadian Rockies.

## Vancouver

### Vancouver

Vancouver is Canada's largest volume seaport, situated on the southwest coast of B.C. Named after Captain Vancouver who charted the coastal waters in 1792. Vancouver was incorporated as a city on April 6th, 1886, although stragglers had settled in the area as early as 1862.

## Victoria

Victoria is situated on the southern tip of Vancouver Island, and the site was selected by the HBC Factor, James Douglas, for a new Headquarters for the company, due to impending loss of Fort Vancouver to the Americans. Incorporated as a city on August 2nd, 1862. While Fort Langley was selected as the capital of the mainland colony in 1858, and New Westminster enjoyed the dubious honour from 1859-68, it was from Victoria that actual control has always been exercised.

## Wells

**Wells**

Wells is a small mining and tourist town in the Cariboo District of central B.C., located on Highway 26, 74 km (46 miles) from Quesnel and 8 km (5 miles) before the highway's terminus at Barkerville. It gains much of its revenue and jobs from tourists who pass through on their way to the Bowren Lake Provincial Park and to the historic museum town of Barkerville.

## West Vancouver

### West Vancouver

Across the entrance to Burrard Inlet from Vancouver, it was incorporated as a District Municipality on March 15th, 1912. Having severed itself from North Vancouver. The West Vancouver ferry had its birth on November 4th, 1909 when the West Vancouver Transportation Company operated the first trip from Vancouver. It used the West Vancouver, a 12 metre (40 foot) gasoline powered boat, with a capacity of 75 passengers. The company was founded by John Lawson, John Sinclair, Robert MacPherson and William C. Thompson.

## Yale

Yale

Established as an H.B.C. trading post in 1847, Yale is the head of river navigation about 209 km (130 miles) up from the mouth of the Fraser River. It was an important location during the Fraser River gold rush and also during the construction of the railway in the early 1880's, as men and supplies could come as far as Yale by river steamer, but then had to journey on foot or by wagon to get into the interior. Completion of the railroad in 1885 brought a quick decline to activity in Yale. Named after James Murray Yale of the H.B.C.

## Zeballos

### Zeballos

Zeballos is a deep-sea port surrounded by rugged mountains and forests, located on the Zeballos River delta, at the end of Zeballos Inlet within the territory of the Ehattesaht Chinehkint First Nation. It is accessible from Highway 19, about a two and half hour drive north of Campbell River. Zeballos' position relative to nearby Nootka Sound and Kyuquot Sound make it a popular "jump-off" point for tourists and anglers. The eponymous inlet was named for Lt. Ciriaco Ceballos, a crew member aboard an early ship of Spanish explorer Alessandro Malaspina's expedition (1789-1794). The location of Zeballos remained relatively obscure until over 120 years later, when a mining camp by that name emerged due to a gold rush in the 1930s.
