**SPECIAL NOTE**

---

The coins listed in this catalogue are not duplicates which I am disposing of. This is absolutely a listing of my entire superb collection of the coins and tokens of nearly all countries.

I have endeavoured to simplify the grading of the coins to as few conditions as possible, and yet describe each item properly. I should say that the listing is under-rated. For instance, a coin which is listed as very fine, would in many cases be about an uncirculated coin.

As I have very few duplicates, especially in the best condition I would suggest that you make a second choice for any particular coin in which you may be interested. You may find that my second or third coin is as good as you may require for your collection.

You may bid with confidence in me, as I guarantee every item as described. All bids will be fairly treated, and I will return deposits promptly to unsuccessful bidders.

No items are priced, as I consider those who bid will be intelligent collectors governed by their desire for a certain item, the market values and by my description of the item.
